

HİDAYET ÇİFTÇİ

JUNIOR FULL-STACK DEVELOPER

Manisa, TURKEY | +905458325348 | hidayetcft@gmail.com | [LinkedIn](#) | [Github](#)

SUMMARY

Computer Engineering graduate with hands-on experience in web and mobile application development. Worked on corporate projects using React, React Native, and ASP.NET Core technologies. Experienced in both frontend and backend development, with a focus on building scalable, maintainable, and user-focused software solutions.

EDUCATION

Karabük University

September 2021 – June 2026

B.Sc. in Computer Engineering – 3.19 / 4.00 GPA

TECHNICAL SKILLS

- **Frontend:** JavaScript, TypeScript, React, Next.js, React Native, Expo, HTML, CSS, Tailwind CSS
- **Backend & Database:** C#, ASP.NET Core, Entity Framework Core, Express.js, PostgreSQL, REST APIs, JWT Authentication, RabbitMQ
- **Tools & Practices:** Git, GitHub, Postman, Jira, Figma, N-Tier Architecture, Repository Pattern

WORK EXPERIENCE

Full-Stack Developer Intern, Ramsey / Gurmen Technology – Karabük, Turkey

February 2026 – May 2026

- Participated in backend development processes of a corporate vehicle rental and service management system built with ASP.NET Core, PostgreSQL, and Entity Framework Core following an N-Tier architecture.
- Implemented JWT-based authentication and role-based authorization mechanisms.
- Contributed to asynchronous messaging, background job processing, data validation, and logging infrastructures using RabbitMQ, Hangfire, FluentValidation, and Serilog.
- Developed mobile application screens for iOS and Android using React Native, Expo, and Redux Toolkit, including REST API integrations and state management.

Frontend Developer Intern, NDM Software – Istanbul, Turkey

June 2025 – August 2025

- Developed responsive web interfaces and reusable UI components using React and Next.js.
- Integrated backend APIs and developed user-focused web pages
- Developed mobile application screens using React Native (Expo), contributed to file-based routing architecture, performance optimizations, and collaborative development processes using Git/GitHub, Postman, and Jira.

Frontend Developer Intern, Innoventures – Karabük, Turkey

November 2024 – December 2024

- Developed a weather application using React, TypeScript, and Tailwind CSS.
- Implemented data fetching, caching, and error handling using TanStack Query.
- Built a multilingual, responsive interface with React Router, Context API, i18n, and Chart.js.

Frontend Developer Intern, Extramus – Terranova da Sibari, Italy (Erasmus)

July 2024 – October 2024

- Developed responsive user interfaces for an HR platform using React, JavaScript, and HTML/CSS based on Figma designs.
- Worked on REST API integrations, authentication workflows, and CRUD operations using Axios.
- Collaborated within an international team using Git/GitHub and delivered project demos and presentations in English.

PROJECTS

Teknofest - Air Defense System

February 2025 - August 2025

- Developed a real-time balloon detection system using Python and computer vision technologies.
- Integrated autonomous and manual firing modes through joystick control.
- Implemented embedded system integrations using Arduino and Raspberry Pi.

AI-Powered Education Management System

November 2025 - May 2026

- Developed a full-stack education management platform with Admin, Teacher, and Student roles using Next.js, Express.js, and MongoDB.
- Designed an AI-powered chatbot and question-answering system utilizing Ollama, Qdrant, and a Hybrid RAG architecture (BM25 + Reranker).
- Built an asynchronous processing pipeline using BullMQ and Redis to manage document uploads, chunking, embeddings, and automated exam generation workflows.

Vehicle Service Management System

April 2026 - May 2026

- Contributed to the development of a corporate vehicle rental and service management system during my internship at Ramsey.
- Participated in user authorization, vehicle and service record management processes, and mobile application screen development.

HOBBIES

Football, Traveling, Chess, Reading, Cinema
